

Partner Information Supplement

Netherlands

OVERVIEW

This supplement has been prepared to provide you with a summary of the tax consequences and other issues associated with the grant of restricted stock units (“RSUs”) settled in shares of common stock of Starbucks Corporation (the “Company”) under its 2005 Long-Term Equity Incentive Plan (the “Plan”).

This supplement is based on tax and other laws in effect in your country as of August 2016. It does not necessarily address all local laws that may apply to you. Such laws often are complex and can change frequently. As a result, the information contained in the supplement may be outdated at the time you vest in your RSUs and acquire Shares of the Company’s common stock (“Shares”), or at the time you sell such Shares.

Please note that this supplement is general in nature and does not discuss all of the various laws, rules and regulations that may apply. It may not apply to your particular tax or financial situation, and the Company is not in a position to assure you of any particular tax result. **Accordingly, you are strongly advised to seek appropriate professional advice as to how the tax or other laws in your country apply to your specific situation.**

If you are a citizen or resident of another country (or are considered as such for local law purposes) or if you transfer residency and/or employment to another country after the RSUs are granted to you, the information contained in this supplement may not be applicable to you.

This document constitutes part of a prospectus covering securities that have been registered with the U.S. Securities and Exchange Commission under the U.S. Securities Act of 1933, as amended.
